# What is the ECNP Congress?

*Europe's largest meeting for the science and treatment of disorders of the brain!*

Attracts 5,000 psychiatrists, neuroscientists, neurologists, psychologists and neurobiologists from over 100 countries around the world.

Spans the spectrum of human mood, behaviour, cognition and emotion – from basic science to clinical care.

Brings you the latest in brain science and the future of CNS treatments.

## Why you shouldn't miss it

The ECNP Congress is where the science of new brain treatments – basic, translational and clinical – comes together.

It is for all those involved in research into human brain disorders and the science of their treatments.

As Europe's best-attended psychiatrist meeting, the ECNP Congress provides a full programme of educational and clinical sessions.

## Congress programme

The scientific programme is the core of the ECNP Congress. Topics cover the spectrum of CNS research, with a special emphasis on linking fundamental discoveries to clinical applications and identifying the treatment strategies of the future.

The provisional programme will be published by October 2019 on <https://2020.ecnp.eu> and is updated regularly.

## Abstract submission

By November 2019, the abstract submission opens. Accepted abstracts will be published in the congress supplement to the journal *European Neuropsychopharmacology*.

## Registration

There are special discounts for ECNP Members, Early Career Scientists, Non-MD's and residents of a country with a developing economy (CDE). The online registration will open by October 2019.

## Industry

Companies and organisations involved in clinical and pre-clinical research, diagnosis and treatment of disorders of the brain are invited to contribute to the 33<sup>rd</sup> ECNP Congress.

We offer a wide range of services including industry sessions, exhibition, group registration and accommodation.

ECNP offers a variety of different sessions designed to appeal to a wide range of congress participants, among which:

- Scientific Symposia
- Keynote Lecture
- Plenary Lectures
- Educational Update Sessions
- ECNP Inspired
- New Medications Session
- Brainstorming Sessions
- Campfire Sessions
- Career Development Sessions
- Poster Jams
- Top Paper Sessions
- Industry Sessions

*"ECNP is where neuroscience meets the living brain, where research breakthroughs are applied to real-world health challenges, and where the world's best scientists map out the future of CNS treatments."*
